

Case Study 2

A Fortune 500 European conglomerate company faced problems with its existing transport management tools and faced issues around billing reconciliation, vehicle tracking, rostering the transport schedule of employees, etc. The company approached Agiledge to help them re-design the employee transport management process by developing a sustainable technological solution, that reduced costs and improved employee satisfaction associated with the transport management process

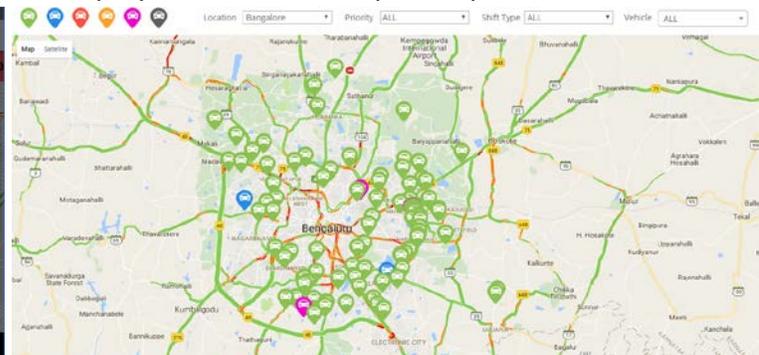

The Solution

Agiledge performed a thorough analysis of the existing transport management tools and end to end transport management process at the company. After performing the As-is analysis of the existing process and tools, Agiledge proceeded to re-design the entire process using ATOm , a cloud based solution. Agiledge automated the entire transport management process and provided the following solution to the company –

- Real time tracking of vehicles for Employees and the transport department

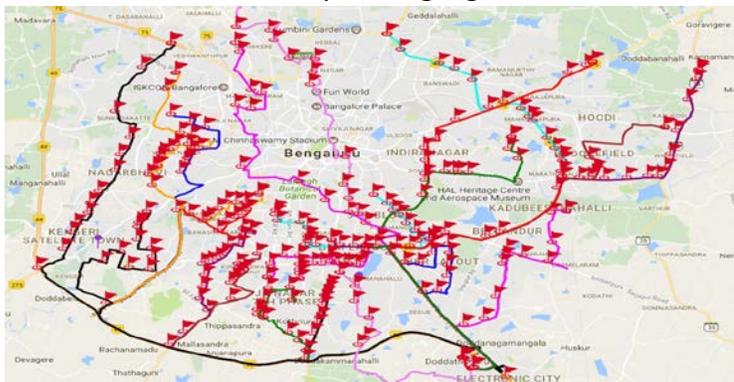

(Employee tracking)

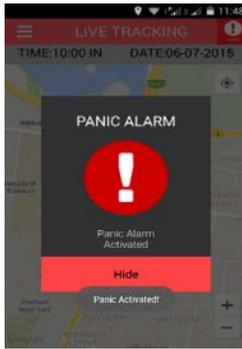

(Transport Department Tracking of all Vehicles)

- Elimination of manual intervention in route planning with the implementation of ATOm's advanced route planning algorithm.

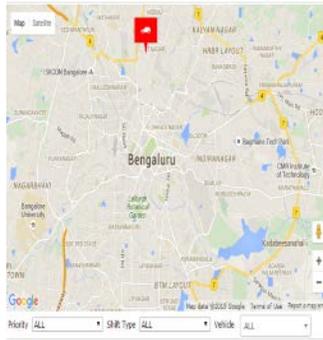

- Paperless billing which eliminated the manual reconciliation process, reduced man hours spent in billing and reduced discrepancy in vendor payments

- Elimination of safety risk for women employees by incorporation of a PANIC alarm, which alerts the transport department in real time, and provides for real time tracking of the vehicle.

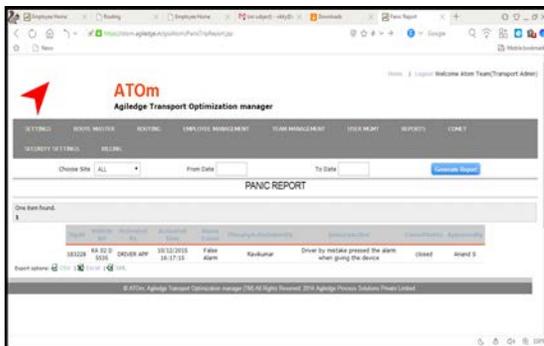

Panic Alarm

Color of Vehicle Changes to Red

Vehicle #	Status	Location	Total Engrs	Bordered	Date-Time
111104	Panic Alarm Pressed	14, 1st Cross Rd, HSR Village, Bengaluru	2	1	2015-12-24 11:07:50.0

Panic Report Dashboard

Benefits for the company

The company realized a 20% reduction in costs by implementing ATOm. Apart from reduced costs, the company also realized the following gains –

Improvement in Vehicle Utilization – 21.3%

100% automation of the billing process for transport.

75%+ improvement in employee satisfaction rate with the transport process
